

TO PLACE AN ORDER

- Orders are accepted no later than October 1st of each year for Sugar pine, and no later than December 1st for all other species.
- Order by mail using the enclosed Order Form or by phone at (530) 559-1404.
- 40% deposit required at time of order.
- Cancellations will be accepted up to January 1st of each year.
- Minimum order is 200 trees per species.

SHIPPING AND HANDLING

- Seedlings are available for pick-up or delivery Prior to May 15th depending on weather conditions.
- Pick-up is available at the USDA Nursery in Placerville, CA. free-of-charge.
- Shipping charge is \$50.00/box and \$125/bag.
- All UPS/ FedEx orders are shipped from the USDA Nursery on Mondays and Tuesdays.

TERMS AND CONDITIONS

- Full refund will be made, without penalty, in the event the RCD is unable to make delivery for any reason. No refunds after May 1st.
- It is agreed between the purchaser and the RCD that our liability will not exceed the original purchase price of the product excluding shipping costs.
- The RCD assumes no responsibility or liability for the planting of any tree seedlings and in the sale thereof, makes no warranties, expressed or implied, of merchantability or fitness for a particular purpose and makes no warranties regarding the survival or rate of growth of any seedlings.
- Please note: the CAL FIRE seed bank is a major source for seed in this program. As such, all parties receiving seedlings grown from seed provided by CAL FIRE may be asked by CAL FIRE to agree to periodic monitoring of seedling viability. This shall be done at mutually agreed-upon timeframes post-sale between CAL FIRE and purchaser, but ideally at 2-, 5-, and 10-year minimum increments, and can be satisfied, depending, through the sharing of site images, virtual or in-person inspections by CAL FIRE staff or its approved partners. A more specific monitoring plan may be developed between involved parties on a case-by-case basis, especially regarding experimental studies, such as climate modeling, or other unique ventures. GPS coordinates of planted project site(s) may need to be provided to CAL FIRE, substantiated with aerial imagery or online mapping tools, as well as other informative data relative to tree survival or growth rates.

Species	Top Height	Tolerance	Diameter	Tolerance	Root Length
All	10 cm	-3 cm	3 mm	-0.5 mm	20.5-26 cm max.
		+6 cm		+4 mm	

Enabling Legislation

Division 9 of the PRC§9409 allows for the District to make improvements or conduct operations on public lands, with the cooperation of the agency administering and having jurisdiction thereof, and on private lands, with the consent of the owners thereof, in furtherance of the prevention or control of soil erosion, water conservation and distribution, agricultural enhancement, and erosion stabilization, including, but not limited to, terraces, ditches, levees, and dams or other structures, and the planting of trees, shrubs, grasses, or other vegetation.

The forests of the Sierra Nevada are some of the most productive tree growing areas in the world. With careful thought and planning, you should be able to grow a healthy stand of trees that achieves your goals as a landowner. Reforestation and restoration projects yield better air and water quality, enhanced wildlife habitat, greater biodiversity and ecosystem sustainability, healthier forests, reduced soil erosion, and increased timber production.

A number of private tree nurseries can supply seedlings grown from parent trees native to the same elevation and geographical zone as your property (known as seed zones). Planting seedlings from the appropriate seed zone will ensure that they will tolerate the climate and soil type where you are.

All seedlings grown at the USFS Placerville Nursery are grown to USFS Region 5 specifications and shall meet phytosanitary certification regulations pertaining to shipments of trees.
